

ABSTRACT

The research was carried out in Mara North Conservancy the research was based on the causes of HWC in MNC, Enkikwei encroachments and the peoples' attitude towards conservation based on the results from the research 100% said poor compensation fee 45% said that leasing fee was too small and on the possible ways in which they can be controlled to ensure that both wildlife and humans are safe. e.g. increasing leasing fee, compensation, translocation of people to new areas to reduce the conflict, changing people's attitude towards conservation were some of the ways of controlling human wildlife conflicts since both sides suffer when there is conflict better strategies are needed to mitigate them,
